

OCTOBER TRAIL PLAN

Jamaica North Trail

7.92 Miles

This month's trail route will highlight all 7.92 miles of the Jamaica North Trail – a shaded, flat trail that'll be perfect to see the changing colors of fall.

The Jamaica North Trail extends from downtown Lincoln to south Lincoln (Saltillo Rd.) and provides great scenery. Plus, three other advantages:

1. It's shaded
2. It's straight
3. It's flat, with little to no hills

You can either start downtown (4th & J) or at Saltillo Road. There are not many other parking options along the trail but if you don't want to tackle it all at once, you could start at the trail parking area at Speedway Village. From there, it is a short walk to a cement path connecting into the Jamaica North.

START

Start downtown park at 4th & J Streets, right on the street.

You'll see this trail sign at the start.

When you see this sign, go under the A Street bridge.

This is the crossing at Park Blvd., just after Sherman Field, and right before Speedway Village.

Jamaica North meets the Salt Creek Trail here – make sure you stay straight to stay on Jamaica North.

The GPTN Connector Bridge is over head and connects the Jamaica North to the Rock Island Trail.

This is the sign you'll see where the trail meets Saltillo Road and turns into the Homestead Trail.

END

Stay safe, active & healthy. We look forward to seeing you on the trails!
